

TRITON

OUR SECTORS

Energy

We serve this sector through leasing and selling Flatracks and Open Top Containers worldwide.

OUR SECTORS – ENERGY

We stock Flatracks, Open Top, and Dry Containers globally

Our equipment is designed to handle harsh environments and challenging working conditions.

Energy and renewable energy equipment can be challenging to transport; solar panels are fragile and susceptible to damage; wind turbines are typically heavy and oversized. In addition, the pipes, oil drums, machinery, and other equipment used in oil and gas operations also usually fail to adhere to ISO Container dimensions and are therefore difficult to load and ship safely.

Quality equipment available worldwide

We lease and sell a range of equipment specifically engineered to carry heavier loads and out of gauge cargo, including Flatracks and Open Top Containers. Our vast international operating infrastructure allows us to deliver an unrivaled equipment supply to our customers. At the same time, our scale enables us to operate with the lowest cost ratios in the industry.

Renewable energy conversions

It is possible to convert purchased Triton Dry Containers into bespoke housings for solar and wind energy producers. They can also be used as cost-effective, secure battery banks to create scalable energy solutions.

Our commitment

At Triton, we work closely with our manufacturers to make environmentally-friendly improvements to our manufacturing processes and our equipment designs.

PLEASE NOTE: The following pages showcase a small sample of products in the Triton global inventory. We stock a wide range of products for lease and sale in various conditions. Get in touch with your local Triton representative for more information.

20ft Dry Container

CLASSIFICATION

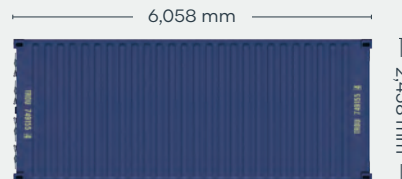

For Sale: New

Available via Triton's global network of supply locations.

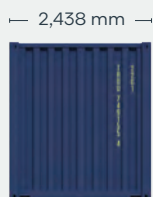

FEATURES

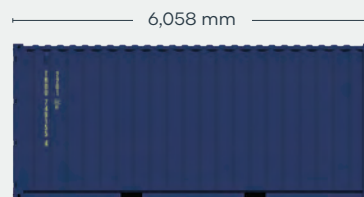

- Manufactured with rust resistant corten steel
- Secure and weatherproof, with vents to allow airflow
- Resistant to damage and corrosion
- Superior paint systems
- Great options including 80 micron floor coating, lock boxes, waist-high door locking handles
- Incredibly versatile and suitable for customers to modify into a wide range of applications
- Advance orders in your preferred color (minimum volume required)
- Triton's industry leading new production testing and inspection criteria ensures the highest quality container
- Moved from factory to most major ports in the world
- Backed up by Triton's global network of supply locations and dedicated sales and support teams
- Available globally
